PROFESSIONAL SUMMARY

Full stack developer who builds web and mobile applications with React, TypeScript, Next.js, Laravel, and Node.js, and makes production systems observable. Rolled out metrics, distributed tracing, structured logging, SLOs, and runbooks across 45+ Java Spring Boot and Node.js microservices at Trax Technologies. Delivers client projects end to end, including a live emergency response platform with an Android app for a local government unit.

TECHNICAL SKILLS

Frontend: React, React Native, Next.js, TypeScript, JavaScript, Redux, Zustand, TanStack Query, Tailwind CSS, PWA, Capacitor

Backend & Data: Laravel, PHP, Node.js, Express.js, Java Spring Boot, REST APIs, Sanctum, MySQL, PostgreSQL, Supabase, Kafka

Observability: OpenTelemetry, Prometheus, PromQL, Micrometer, prom-client, Grafana, Grafana Tempo, Grafana Alloy, Log4j2 structured logging, SLOs, runbooks

Platforms & Tools: Git, GitHub Actions, CI/CD, Vercel, WordPress, Jira, Confluence

PROFESSIONAL EXPERIENCE

Software Engineer, Observability **Aug 2026 – Present**

Trax Technologies (Trax Prizma platform)

- Instrumented 45+ Java Spring Boot and Node.js microservices, including audit, accruals, invoice review, cost allocation, rating, carrier, and AI data processing services.
- Added RED and business telemetry with Micrometer and prom-client, and standardized Grafana Alloy scrape targets on `/metrics` and `/actuator/prometheus`.
- Implemented OpenTelemetry tracing to Grafana Tempo with HTTP, JDBC, and Kafka spans, and propagated trace context across Kafka producers and consumers.
- Introduced Log4j2 structured logging with trace IDs so engineers can jump from a log line to the full request trace.
- Maintained metrics and logs explorer dashboards as code in git (146+ commits), defined SLOs, and wrote runbooks for each service.
- Resolved production issues, including context-path scrape failures, HikariCP pool sizing ignored by datasource wrappers, and JVM log-file exhaustion.
- Authored reusable AI agent skills that encode the instrumentation, recheck, and status-tracking workflow so teams can apply it consistently.

Freelance Full Stack Developer **May 2025 – Present**

Client projects

- **S.A.F.E.R. (Barangay Lapasan):** Built a fire, flood, and earthquake reporting platform with a Laravel 12 API, queued AI photo classification, geo-radius alerts, evacuation-center tracking, PWD and senior citizen verification, and a React and TypeScript PWA with Google Maps, shipped as an Android app via Capacitor. Live at safer.freehosting.dev.
- **Science Quiz Game:** Built a gamified learning platform with Laravel, Spatie roles and permissions, and React, featuring student, teacher, and admin dashboards, classroom rooms, multiple question types and puzzles, badges, progress tracking, and leaderboards.
- **LinkCraft:** Built a URL shortener with Next.js 15, React 19, and Supabase, including link analytics, customizable bio pages, QR codes, and a GitHub Actions build pipeline.
- **POS & Warehouse Management (in progress):** Designing a Laravel 12 and Sanctum API with seven role levels, from super admin to cashier and warehouse worker.
- **Wedding Invitation Platform:** Built personalized invitation links, RSVP workflows, guest notes, real-time status tracking, and an admin statistics dashboard using React, Express.js, MySQL, and Supabase.

Frontend Developer **Jul 2025 – Jul 2026**

CLIMBS Life and General Insurance Cooperative | Full-time

- Developed responsive applications with React, Redux, and WordPress, creating reusable components and reliable state-management flows.
- Built and integrated Laravel APIs and backend functionality to support end-to-end web application workflows.
- Diagnosed and resolved full-stack defects, improving application stability, maintainability, and user experience.
- Automated build and deployment workflows with GitHub Actions and tracked sprint delivery in Jira.

Full Stack Developer Intern **Feb 2025 – May 2025**

Syntactics Inc. | Engineering Team Lead

- Developed responsive applications using React, Next.js, Node.js, and Laravel.
- Built custom WordPress themes and improved website performance, loading speed, SEO, and cross-device usability.

React Frontend Developer **Aug 2024 – Oct 2024**

Sustainable Sprinklers | Freelance

- Migrated the company website from static HTML and CSS to React and connected it to backend data services for dynamic content.

EDUCATION

Bachelor of Science in Information Technology **May 2025**

University of Science and Technology of Southern Philippines | Cagayan de Oro City

- Capstone: Pick Me Up, a ride-booking web and mobile app with email verification, status notifications, and admin account management, deployed through Vercel CI/CD.
